

THE ABILITEES

Project *Printing a Brighter Future*

The AbiliTees Project will provide students with the opportunity to succeed in our community.

Project members will be given the chance to learn and demonstrate many functional skills.

Engaging the students will bring the feeling of purpose, build self confidence and relationships with others.

The first project for September will be mask printing. Learning the screen printing process while working as a team will encourage communication and hands on experience. From printing, to packaging, to distribution the students will work together each having their own step in the project. Offering masks will be a positive way to encourage safety and unity.

The daily tasks are not limited to just printing. There are many ways students can contribute in the school and community: shredding, making copies, filling office supply orders, and promoting KINDNESS in our society.
